BATTERY GUN LINE

Hytorc has released its Lithium Series Battery Gun, an addition to the company's current line of dynamic bolting equipment. With the need for external wires, pumps and additional handling parts removed, the Hytorc battery guns are able to expand job-site reach, the company said.

The 36 V battery gun features an integral metal frame with a color graphical user interface. The two-speed gun has the capability for both torque and angle practices and will have a product line that includes numerous output capacities comprising of 399, 949, 1356 and 2712 Nm models.
