

Company debuts Lithium Series Battery Gun line

HYTORC

Dedicated to improving safety, speed and accuracy in industrial bolting, HYTORC has always pushed the limits with innovative tool designs, solutions and improvements for the industry. The company continues this tradition of steady upgrades with its newest innovation, the Lithium Series Battery Gun.

customers have the ultimate solution for portability and convenience in industrial bolting. Together, they are safer, faster and more accurate than all comparable systems. The gun is a precision torque/tension compatible machine you can set and get your desired load. It uses precision gearing to

produce constant, calibrated power, assuring you will achieve bolt load within your window of accuracy every time.

“This revolutionary addition to our current product lineup will continue to position the HYTORC brand as a powerhouse in the field,” said Eric Junkers, president of

HYTORC. “The Lithium Series Battery Gun will retain our leadership in the industry, and we will continue to expand and grow with each new product that is unveiled.”

HYTORC's Lithium Series Battery Gun.

The Lithium Series Battery Gun is a groundbreaking improvement to HYTORC's line of current dynamic equipment. The Lithium Series will open countless doors for HYTORC customers as the benefit of portability with the new guns will lead to a plethora of new, unique applications and projects. With the need for external wires, pumps and additional handling parts removed, the HYTORC Lithium Series Battery Guns are able to greatly expand jobsite reach.

The 36-volt Lithium Series Battery Gun is a huge technological advancement for the HYTORC line.

“Our company was centered on the trademark hydraulic tool offerings, many of which still dominate the product line today,” said Jason Junkers, COO of HYTORC. “However, we are always striving to discover the next big break in industry technology. Our HYTORC R&D department is constantly on the cusp of new technology, such as launching our pneumatic air tool line almost 10 years ago and now with our Lithium Series Battery Gun.”

The 36-volt Lithium Series Battery Gun is a huge technological advancement for the HYTORC line, featuring an integral metal frame with a color graphical user interface. The two-speed gun has the capability for both torque and angle practices, and will have a product line that includes numerous output capacities, comprising 250, 700, 1,000 and 2,000 foot-per-pound models.
